

CAMP Systems International and Blackhawk Modifications have partnered to provide you with the best in both performance and maintenance tracking for

your aircraft. For new Blackhawk King Air customers, CAMP is offering FREE enrollment of your aircraft on to the CAMP Maintenance Tracking program – a savings of \$1,500. Through our partnership we are also offering an additional FREE year of CAMP service when you enroll – 24 months of CAMP for \$2,400.

In addition, you will receive the CAMP Electronic Logbook (E-Log). All logbook details sent to CAMP will be scanned and archived. These images are linked to their respective maintenance tasks and the CAMP E-Logs allow you to search all of the logs related to

your aircraft (airframe, engine, APU, etc.). In fact, even hand written pages are scanned and become searchable items.

- **Free Enrollment**
- **12 Months Free**
- **Free E-Logs**
- **Free Analyst Support**

CAMP Systems International has been the industry standard in business aircraft maintenance tracking for 40 years. Today, CAMP provides a broad range of web-based aviation solutions for more than 5,000 business aircraft worldwide. Our services include Maintenance Management, Inventory Control and Flight Scheduling. We have programs and services for everything from a Beech Bonanza to a Boeing 747, making CAMP the ideal solution for all fleets.

To take advantage of this offer or to request a copy of CAMP's corporate brochure please contact:
