To: Jim Allmon

Dear Jim,

Please let me take a moment to express my thanks for your persistence and belief in your product that led me to make the Blackhawk 200 XP upgrade.

As you remember, I had elected to rebuild one of my -41's with one of the major engine rebuilders just to get the surprise of a lifetime, a \$450,000 overhaul on just one engine. There is more to this story, but the bottom line is your engine upgrade has delivered on every promise. Even the FBO which had never done the exchange completed it in only 3 days. We love the increase in TAS, approx. 280 knots, even with high flotation gear, and especially the decrease in time-to-climb.

It is a great comfort in having factory new -42 engines and all they offer. No matter who does the math, it makes a great deal of sense up front, not to mention performance enhancements, and last but not least the reduced cost on the next overhaul.

Many thanks for a job well done.

Sincerely,

Steve Brackett
