

XP67A ENGINE+ UPGRADE VS. JETS

Single pilot operation.

The King Air 350 can be flown just one pilot, unlike many popular business jets which require dual-pilots due to increased workload.

Greater payload.

The King Air 350 has a more comfortable cabin and far greater seating and cargo capacity than similarly priced jets.

Go explore.

See more of the country with the ability to operate from unimproved airfields with shorter runways and do it with reduced worry over FOD.

Save money.

The Blackhawk King Air 350 has shown to be less expensive to operate than comparable business jets.
